

Table of Contents

Standards and Outcomes.....	1
Learner Objectives	1
Procedures	
Amsler Grid Testing	2
Autorefracton.....	4
Axial Length Measurement: A-scan Ultrasonography.....	5
Axial Length Measurement: Partial Coherence Interferometry (IOL Master).....	7
Biopsy: Eyelid or Conjunctiva	10
Botulinum: Injection of.....	12
Brightness Acuity Test (Glare Test).....	14
Chalazion Incision and Drainage.....	16
Chelation with EDTA	18
Color Vision Testing Using Ishihara Plates.....	20
Confocal Scanning Laser Ophthalmoscopy with Heidelberg Retinal Tomograph.....	21
Contact Lenses: Removal by Other Than Wearer.....	23
Contact Lenses/Soft: Insertion, Removal, and Care by Wearer	25
Contact Lenses/Standard Hard and Rigid Gas-Permeable (RGP):	
Insertion, Removal, and Care by Wearer.....	28
Corneal Scraping	30
Corneal Staining with Fluorescein	32
Corneal Topography	34
DCR Testing for Nasolacrimal Patency.....	35
Disinfection of Ophthalmic Equipment and Environmental Surfaces	38
Endothelial Cell Count.....	43
Epilation: Electrolysis or Cryodestruction.....	44
Epilation: Manual with Forceps	46
Exophthalmometry	47
External Examination of the Eye.....	49
Extraocular Muscle Evaluation and Screening	52
Eye Culture: Conjunctival.....	54
Eye Drops and Ointments: Instillation of	55
Eye Irrigation for Chemicals.....	57
Eye Irrigation: Cleansing	59
Eye Patch: Light	60
Eye Patch: Pressure.....	61
Eye Prosthesis and Conformer: Insertion, Removal, and Care.....	63
Eye Shield	66
Eyelid Compresses: Cold.....	67
Eyelid Compresses: Warm.....	68
Eyelid Eversion.....	69
Eyelid Hygiene for Blepharitis.....	70
Eyelid Suture Line Care.....	72
Facilitating Environmental Control for Persons with Visual Impairment.....	74

Fluorescein: Injection of	77
History Taking for the Ophthalmic Patient.....	80
Hypoglycemia: Guidelines for Treatment in the Ophthalmology Clinic and Office.....	82
Indocyanine Green: Injection of.....	85
Intravitreal Tap and Injection of Antibiotics.....	87
Keratectomy: Superficial – Mechanical	89
Keratometry.....	91
Laser: Patient Preparation and Safety Measures	93
Lensometry: Automated.....	96
Lensometry: Manual	98
Low Vision Aids.....	101
Moisture Chamber	103
Needling of a Filtering Bleb.....	104
Oculoplastic Procedures.....	107
Opacity Lens Meter	110
Optical Coherence Tomography (OCT)	112
Pachymetry: Ultrasonic.....	114
Pediatric Ophthalmic Examination.....	116
Photodynamic Therapy (PDT)	119
Pneumatic Retinopexy	122
Potential Acuity Measurement:	
Potential Acuity Meter (PAM) and Laser Interferometer.....	125
Presurgical Periocular Scrub	127
Prostigmin and Atropine Injection	130
Pterygium Excision With or Without Conjunctival Graft.....	132
Punctal Occlusion Using Hyfrecator or Cautery.....	134
Punctal Occlusion: Insertion of Punctum Plugs.....	136
Punctum Plug Removal.....	138
Pupil Examination	139
Scanning Laser Polarimetry: GDx.....	141
Schirmer Tear Test	143
Slit-Lamp Examination: Basic and Intermediate	145
Subconjunctival and Subtenon Injections.....	152
Tarsorrhaphy	154
Temporal Artery Biopsy	156
Tensilon Test.....	158
Tonometry Using Goldmann Applanation Tonometer.....	160
Tonometry Using Pneumotonometer.....	163
Tonometry Using the Tono-Pen.....	165
Trans-Lid Suture (Quickert Sutures)	168
Triage of the Ophthalmic Patient	170
Ultrasonic Biomicroscopy (UBM)	172
Ultrasonography: Standardized Echography (Combined B-scan and A-scan).....	174
Visual Acuity: Distance	176
Visual Acuity: Near	179

Visual Field Evaluation: Automated	180
Visual Field Evaluation: Confrontation.....	183
Visual Field Evaluation: Goldmann	185
Appendices	
A. Patient Safety Bulletin Number 1: Eliminating Wrong-Site Surgery.....	188
B. Patient Safety Bulletin Number 2: Minimizing Wrong IOL Placement.....	196
C. Test Your Knowledge – Continuing Education Post-Test.....	201
